

INVACARE® TOP END®  
**FORCE™ K**  
HANDCYCLE

The **Invacare® Top End® Force™ K Handcycle** is a kneeling position handcycle available in two custom, made-to-measure aerodynamic designs. The Invacare Top End Force K Kneeler is used by the most able athletes, while the Invacare Top End Force K Double Amputee Kneeler is custom designed for the double above-the-knee amputee. What makes the Invacare Top End Force K Handcycle different from the rest of the Invacare Top End Force Series handcycles? The Invacare Top End Force K Handcycle is a kneeling-only, non-adjustable position handcycle that requires dialed-in measurements and engineering drawings—all of which are easy to find on the website: [www.topendwheelchair.com](http://www.topendwheelchair.com). Can you force the pace? Get the Invacare Top End Force K Handcycle.
